
Theodore Bremner Symposium
on
High-Performance Lightweight Concrete

J.P. Ries & T.A. Holm
Editors

CONTENTS

	Page
Performance of Lightweight Aggregate Concrete in Marine Environment S. Helland	
A Comparative Study of Water Permeability and Chloride Penetration in Lightweight and Normalweight Aggregate Concrete K.S. Chia and M.H. Zhang	
Modeling the Internal Curing of High-Strength Concrete Using Lightweight Aggregates S. Weber and H.W. Reinhardt	
Performance of Structural Lightweight Concrete Made With a Potentially Reactive Natural Sand S.R. Boyd, T.A. Holm, and T.W. Bremner	
Chloride Diffusion in High-Performance Lightweight Aggregate Concrete M.D.A. Thomas	
Application of Self-Compacting Lightweight Aggregate Concrete in Japan T. Sugiyama	
Early Age Cracking Risk of Lightweight Aggregate Concrete T.A. Hammer	

Recent Research on the Mechanical Properties of High Performance Lightweight Concrete	
K.S. Harmon	131
How Information Technology Can Help Sustainability and Aid in Combating Global Warming	
I.L. Kondratova and I. Goldfarb	151
Moisture Dynamics in Lightweight Aggregate and Concrete	
T.A. Holm, O.S. Ooi, and T.W. Bremner	167
Internal Curing of Concrete Using Lightweight Aggregates	
G.C. Hoff	185
Probabilistic Modeling of the Flexural Fatigue Performance of Lightweight Concrete	
V. Ramakrishnan and R.K. Panchalan	205
Lightweight Aggregate Concrete: The Flagship of Sustainable Construction	
R.N. Swamy	225
