ESCS
(Expanded Shale Clay and Slate) is a ceramic aggregate, fired at 2000°F in rotary kilns.

SmartWall Systems:

We've Been Fired!

Because SmartWall units are made with ESCS, they are able to provide thermal stability and strength other wall systems simply can not. When it comes to fire, SmartWall has already BEEN THERE, DONE THAT.

Fire Test leaves SmartWall glowing, but still strong and stable.

Insulating • Strong • Thermally Stable
